Come to beautiful Santa Fe this October! The New Mexico Renewable Energy Transmission Authority is hosting a two-day workshop on this critical topic as we transition to a renewable energy future –

500 Megawatts for 5 Days- Utility Scale Storage-How do we get there?

The workshop will be held on October 19 & 20, 2022 at the historic [La Fonda Hotel](#) in downtown Santa Fe on the Plaza. We will have speakers from the private and public sectors on current and future energy storage technologies, best practices, and policies. We will be finalizing the agenda and speaker list in the coming month. If you are interested in attending or receiving more information, please email us at storage@nmreta.net or call Valerie Moquino at 505-699-0599 and we will keep you updated. Registration for the event is open and a registration form and other information on the workshop is on our website at www.nmreta.com.

There is no charge for attending this workshop, other than your lodging, and we will provide your breakfasts and lunches. We will be limiting attendance, so please reach out as soon as you can if you would like to join us.

If you would like to stay at La Fonda, please make your reservations by calling the La Fonda Reservation Department at 800-523-5002 or 505-982-5511 and choosing Option #1. Please identify yourself as an attendee of the NMRETA Energy Storage Workshop and make your hotel reservations before September 16, 2022, when the room block will be released.

We hope to see you there!
